KANNAN G R

SKILLS

- Teamwork
- Time Management
- Leadership
- Critical Thinking
- Digital Electronics
- Analog Electronics
- Embedded Systems
- programming : C

LANGUAGES

- English
- Hindi
- Tamil

CAREER OBJECTIVE

Motivated Electronics and Communication Engineering student with strong interest in Embedded Systems ,IoT and VLSI. Skilled in microcontrollers, Embedded C, Raspberry Pi, ESP32, and hardware-software integration with hands-on project experience. Eager to apply problem-solving and technical skills to develop efficient and reliable embedded solutions.

EDUCATION

Bachelor of Engineering 2023 - 2027
Dr N G P Institute Of Technology
Coimbatore
CGPA: 7.92/10 (till 5th semester)

Higher Secondary studies 2019 - 2023
Shree Gurukulam Higher Secondary School
Gobichettipalayam
Percentage: 83.33% 500/600

TOOLS & SOFTWARE KNOWN

- **Embedded Tools:** STM32Cube IDE Programmer, Atmel Studio7.0
Proteus 8.0 professional, Arduino IDE, Raspberry
pi imager and VNC
- **Protocols** : UART, SPI, I2C, GPIO
- **VLSI Tools** : Xilinx Vivado , Quartus prime
- **Others** : Google Colab

ACADEMIC PROJECTS

PLASTIC CLASSIFICATION AND SORTING SYSTEM-[2026]

Developed a plastic classification system using Raspberry Pi 3 B+. Implemented TensorFlow Lite model for image-based plastic identification .Integrated hardware and software to automate the sorting process.

SMART DUSTBIN MONITORING SYSTEM-[2025]

Designed a smart waste monitoring system using ultrasonic sensor and Raspberry Pi. Implemented automated email alert system when the dustbin reaches full capacity. Improved efficiency of waste management through IoT monitoring.

LIGHT FIDELLITY BASED LOW POWER TRANSMISSION-[2024]

Designed and implemented a Light Fidelity (Li-Fi) based communication system for low-power signal transmission. Used a laser diode as the transmitter to convert electrical signals into optical signals. Used a solar panel as the receiver to detect light intensity variations and convert them back into electrical signals. Demonstrated wireless data transmission using visible light communication (VLC) principles. Designed basic analog circuitry for signal amplification and detection. Achieved reliable short-distance communication using optical modulation techniques.

INTERNSHIP - 2024

Enthu Technology Solutions India Pvt. Ltd., Coimbatore

- Worked with Raspberry Pi, ESP32, and STM32 platforms.
- Interfaced ultrasonic, IR, and temperature sensors.
- Gained practical experience in embedded systems and IoT development

CERTIFICATIONS -[2023-2026]

- Analog electronics certification in Udemy
- MIT RISC-V on FPGA: Application and Porting
- NIT Synopsis System Verilog for semiconductor design and verification
- Maven Silicon Digital Design
- Internship certificate at Enthu technologies ,Coimbatore
- PCB designing and fabrication workshop at CIT,Coimbatore

ROLES AND RESPONSIBILITIES

- Organized the Workshop “ASIC digital design flow”, in KANAM’25, [2025].
- Organized the a technical event ”TRACK TACTIX” in KANAM’26. [2026].
